The European Student Barometer 2009 Partner Report

Welcome to the European Student Barometer Partner Report 2009.

First of all we would like to thank you for your participation in the European Student Barometer. Through cooperation with institutions like yours, this year has been our most successful yet, with more than 195 000 students taking part in the survey: Twice as many participants as the previous survey.

Over the years, **trendence** has become Europe's leading research institute conducting online student surveys. The results of these surveys are used by employers and universities to learn more about students, making our data an important bridge between higher education and the labour market. We look forward to many more years of cooperation with your institution.

We hope you find this report interesting and useful, and welcome any comments or requests you may have.

Yours sincerely

Ryan King

About the survey

The European Student Barometer has grown to be the largest survey on career, education and employer topics in Europe. More than 775 institutions in 22 countries took part and over 195 000 students answered the survey.

The survey was conducted in the following countries: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Italy, the Netherlands, Norway, Poland, Portugal, Slovakia, Spain, Sweden, Switzerland, the United Kingdom and in two new countries: Romania and Russia.

The field phase of the survey took place from 15.09.2008 – 31.01.2009. The students were asked about their preferences and expectations in their future career, their satisfaction with their university, and the attractiveness of future employers.

The main target group for the survey was business/economics and engineering/IT students. However, we are of course interested in hearing the opinions of all students. Therefore we have three editions of the ESB Partner Report: business, engineering and total.

The survey was conducted online and the students were invited by the universities by email, web page banner or newsletter.

The report is divided into three chapters: Education and university evaluation, Career and the Students.

trendence, a part of the GTI Group, is Europe's leading research institute, specialising in the areas of Employer Branding, personnel marketing and recruiting.

trendence surveys over 260,000 school students, university students and young professionals all over Europe, in China, Singapore and Malaysia on a yearly basis to extract information about their expectations and behaviour in terms of their employer of choice and career decisions. The results of these studies support companies' recruitment and human resources departments in making important decisions about their recruitment and marketing strategies, and enable them to gather vital information about potential recruits. At the same time the results allow universities to evaluate their performance and compare themselves with other universities in their country.

The surveys are conducted in various countries as well as on a pan-European and international level. Examples of **trendence** research surveys are the **trendence** Graduate Barometer with its 22 national editions all over Europe, 'Das Absolventenbarometer' (Germany), 'The UK Graduate Recruitment Review', 'Das Schweizer Absolventenbarometer' (Switzerland) and 'Le Baromètre Etudiants' (France).
