

University of Vic - Central University of Catalonia

Annual report 2022-2023

Introduction

Josep Eladi Baños

Rector
University of Vic -
Central University of Catalonia

At the University of Vic - Central University of Catalonia (UVic-UCC), the 2022-2023 academic year has been one of growth and consolidation. We finished with remarkable results in many ambits: we made progress in teaching, research and knowledge transfer; we have taken steps forward in sustainability; and we have reached important international milestones. Our federation of four entities across four campuses is robust and continues to grow.

The university is at a turning point. Progress over recent years is not a flash in the pan; in terms of social worth and reputation UVic-UCC continues to thrive. To begin with, and for many years, it was a second choice behind metropolitan state-sector universities. Empirical data show that this is no longer the case: the number of students who put down UVic-UCC as their first choice has increased progressively. Some of our degree courses have experienced significant, sustained growth. This positive data goes hand in hand with the position of the university in international rankings, another indicator of progress made.

I would also like to mention highlights such as the graduation of the first cohort of Medicine students, who have studied at the Medicine Campus, with facilities in Vic and Manresa, and several health centres across Catalonia. The success of this complex strategic project is the result of the efforts of many people. This year also saw the launch of our Biomedicine degree, which has filled all its places, and a degree course in Fine Arts. Next year we will start degrees in Dentistry and Digital Society Management, and a university-specific degree in General Audiology, the first of its kind in Spain. All these courses serve to reinforce our academic profile.

In the final stretch of the course, the UP-University consortium, made up of seven European universities including UVic-UCC obtained the European Union Seal of Excellence. This recognition will contribute to our positioning in Europe, along with key advances in research, with SGR external recognition of all 25 research groups and the creation of new research institutes.

The 2022-2023 course also saw the inauguration of three major new sites. Firstly, on 21 October, the Paranimf academic ceremony hall, the adapted old church of the Hospital de la Santa Creu, opened its doors. Together with Vic City Council, we have made this magnificent hall ceded by the Hospital de la Santa Creu Foundation available to other local organisations. Next to the Paranimf is the Gothic Hall, a multipurpose exhibition area, which is already widely used. At UManresa, the new teacher training building is operational, a noteworthy contribution to the growth of the campus and this field of knowledge at the University. At UVic, towards the end of the academic year, the El Remei building welcomed its new occupants, enhancing our presence in this part of the city.

As one year ends and the next begins, the University must rise to new challenges. Our postgraduate schools, which have got off to a sound start, need to continue to progressing in the field of continuing education; we need to continue to make progress in the institutional cohesion of our complex university, and we need to adapt at all levels to the increase in student numbers and new courses. All without forgetting UVic-UCC's social commitment to the local context of its campuses, which has been, continues to be and will always be a distinctive feature of our institution.

I cannot conclude these words without mentioning Ricard Torrents, the founder and first rector of the University, who passed away on 4 March 2023. We remember and honour him, his work and his commitment, leading the project to create a university in Vic, which few thought would be viable. In the last years of his life he told me of his sense of fulfilment about the present and future prospects of the university that he did so much to shape. My gratitude to him and to everyone who collaborated to make possible the UVic-UCC that we have today.
